47,500 cases of paralysis linked to the Polio Vaccine in India

According to USA Today, since August, 107 American children in 34 states have polio symptoms such as paralyzed limbs (non-polio acute flaccid paralysis). According to National Geographic, all the children had been successfully immunized against polio.

Death from Pertussis Vaccine

Of 103 children who died of **Sudden Infant Death Syndrome (SIDS)** 70% had received the Pertussis vaccine within 3 weeks.

http://thinktwice.com/131_ways_for_an_infant_to_die.pdf

Death from Hib Vaccine

749 deaths linked to the administration of the Hib vaccine, 51% of which were sudden infant death linked to the vaccine.

<http://www.greenmedinfo.com/blog/cdcs-own-data-vaccine-infant-death-link>

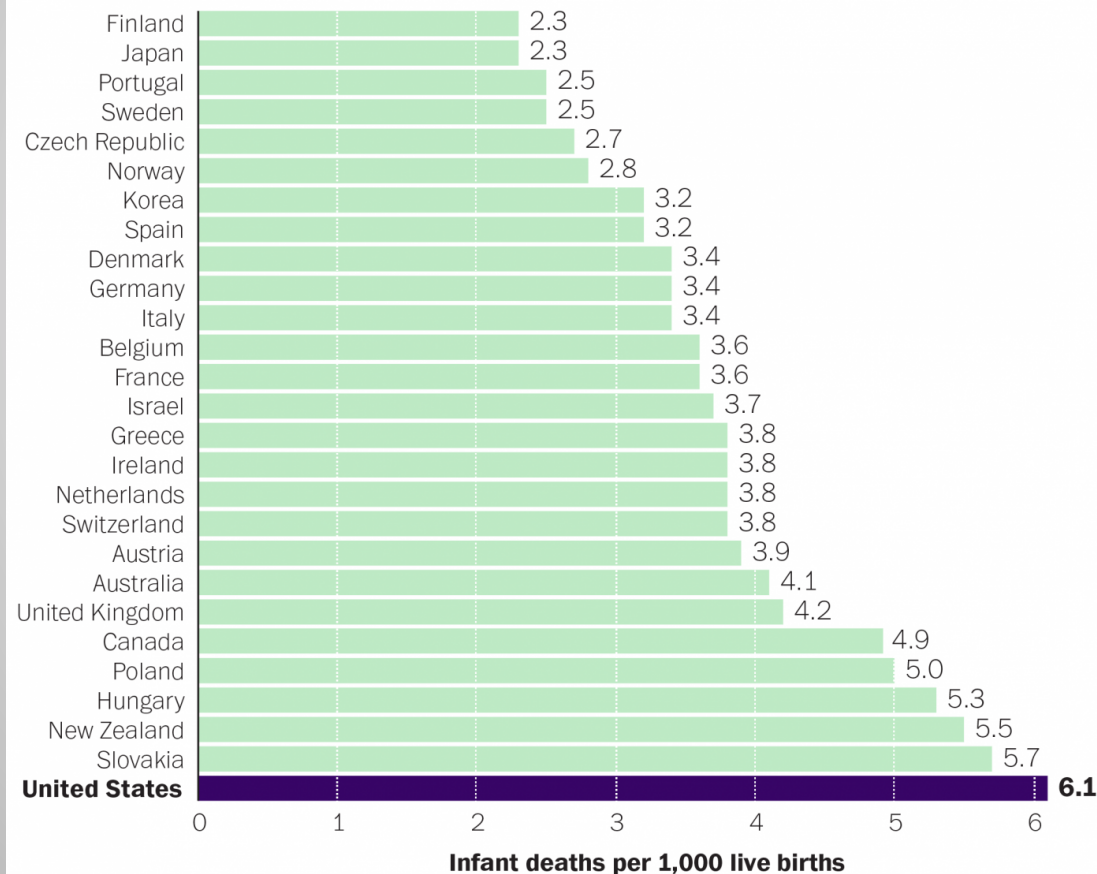

United States has the highest first-day
Infant death rate out of all the
industrialized countries in the world

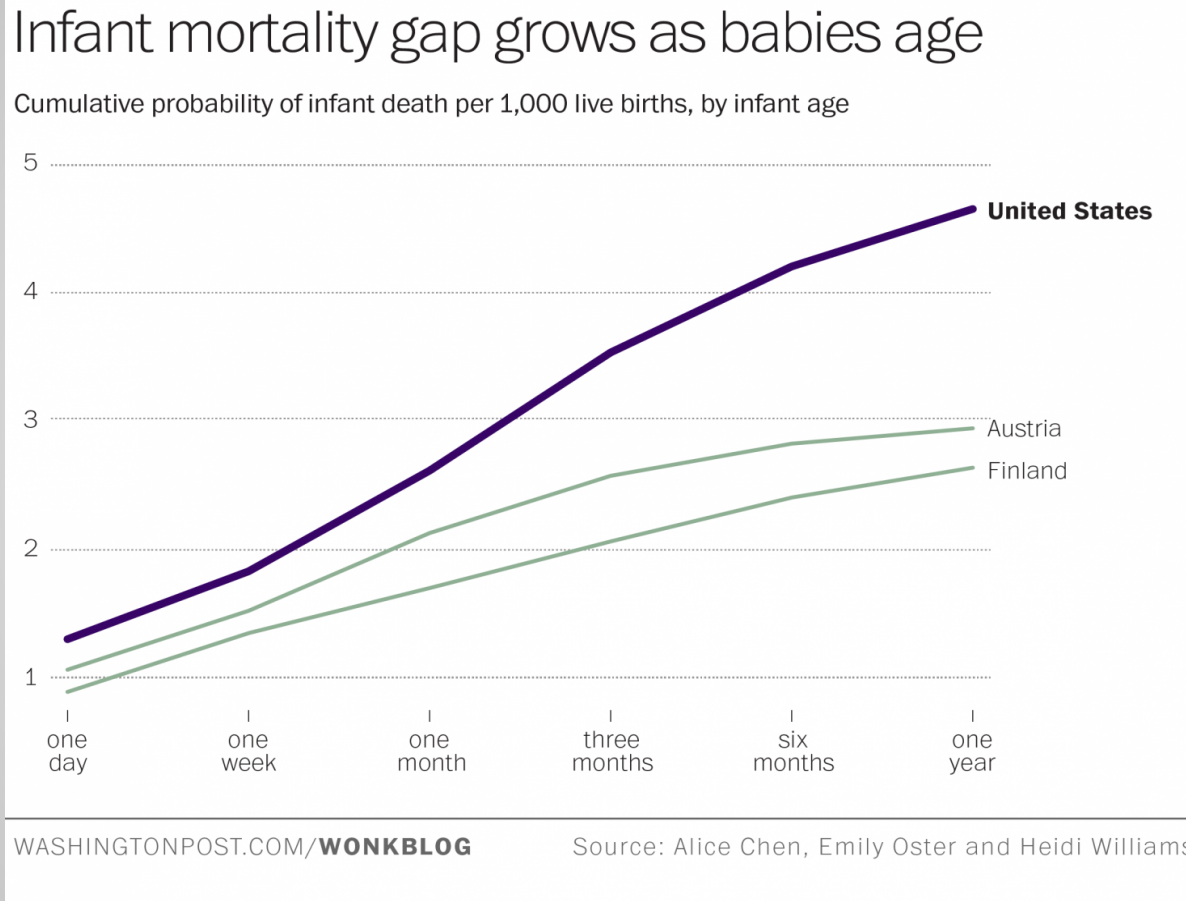

US is the most vaccinated country in the world and yet has one of the highest rates of Infant mortality

U.S. lags behind other wealthy nations on infant mortality

BEFORE & AFTER GARDASIL

Vaccine Injury Awareness Month

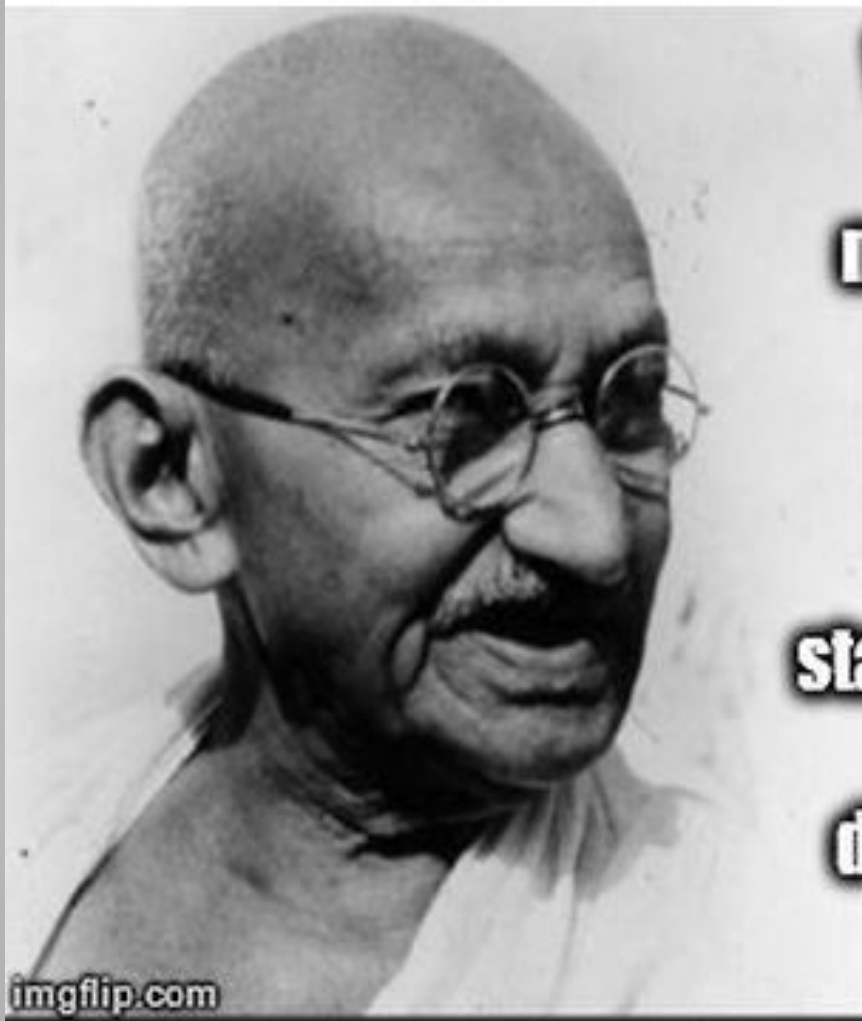

Zeda Pingel . . .
before...

and after Gardasil

Mahatma Gandhi

Vaccination is a barbarous practice and one of the most fatal of all the delusions current in our time.

Conscientious objectors to vaccination should stand alone, if need be, against the whole world, in defence of their conviction.

Mahatma Gandhi

Dr. Rudolf Steiner, Christian Mystic & Clairvoyant, founder Waldorf Schools

I have told you that the spirits of darkness are going to inspire their human hosts, in whom they will be dwelling, to find a vaccine that will drive all inclination towards spirituality out of people's souls when they are very young - Dr. Rudolf Steiner

Annie Besant, President Theosophical Society

“It (Theosophy) declares that all inoculations of disease into the healthy body are illegitimate, and it condemns all such. It declares that all those foul injections of modern medicine which use animal fluids to restore the exhausted vitality of man are ruinous to the body into which they are put” –Annie Besant 1907

**WHO IS CAUSING THE OUTBREAKS?
IT IS THE ALREADY VACCINATED!**

St. Jude Children's
Research Hospital

ALSAC • Danny Thomas, Founder

Mumps outbreak cases 92% vaccinated Chicken Pox 86% vaccinated

St. Jude's Children's Hospital

Visiting Guidelines

Avoid live virus vaccines and people who have received one

Some vaccines are made from live viruses. Currently, these include oral polio, smallpox, MMR (measles, mumps, and rubella) and nasal flu vaccines.

These vaccines may pose a threat to your child's health.

Any person with a weakened immune system, including patients with cancer or HIV infection should not receive live virus vaccines.

Do not allow people to visit your child if:

- They have received oral polio or smallpox vaccine within 4 weeks
- They have received the nasal flu vaccine within one (1) week
- They have rashes after receiving the chickenpox or MMR vaccine

Mandatory Vaccinations for Adults

Feb. 2015 HHS Draft: National Adult Vaccination Plan

- “Adult vaccination rates remain low in the United States, and significant racial and ethnic disparities exist. In 2011, [NVAC](#) recommended the development of a strategic plan with the goal of improving adult immunization”.

<http://www.hhs.gov/nvpo/national-adult-immunization-plan-lp.html>

Need for National Adult Immunization

- “The National Adult Immunization Plan (NAIP) outlined here results from the recognition that progress has been slow and there is a need for a national adult immunization strategic plan” - *cradle-to-grave shots of vaccine*

Stakeholders - Pharmaceutical Industry

- “The National Vaccine Advisory Committee and numerous **stakeholder** groups have emphasized the need for focused attention on adult vaccines and vaccinations”.

Deconstructing Herd Immunity

Cradle-to-grave booster shots

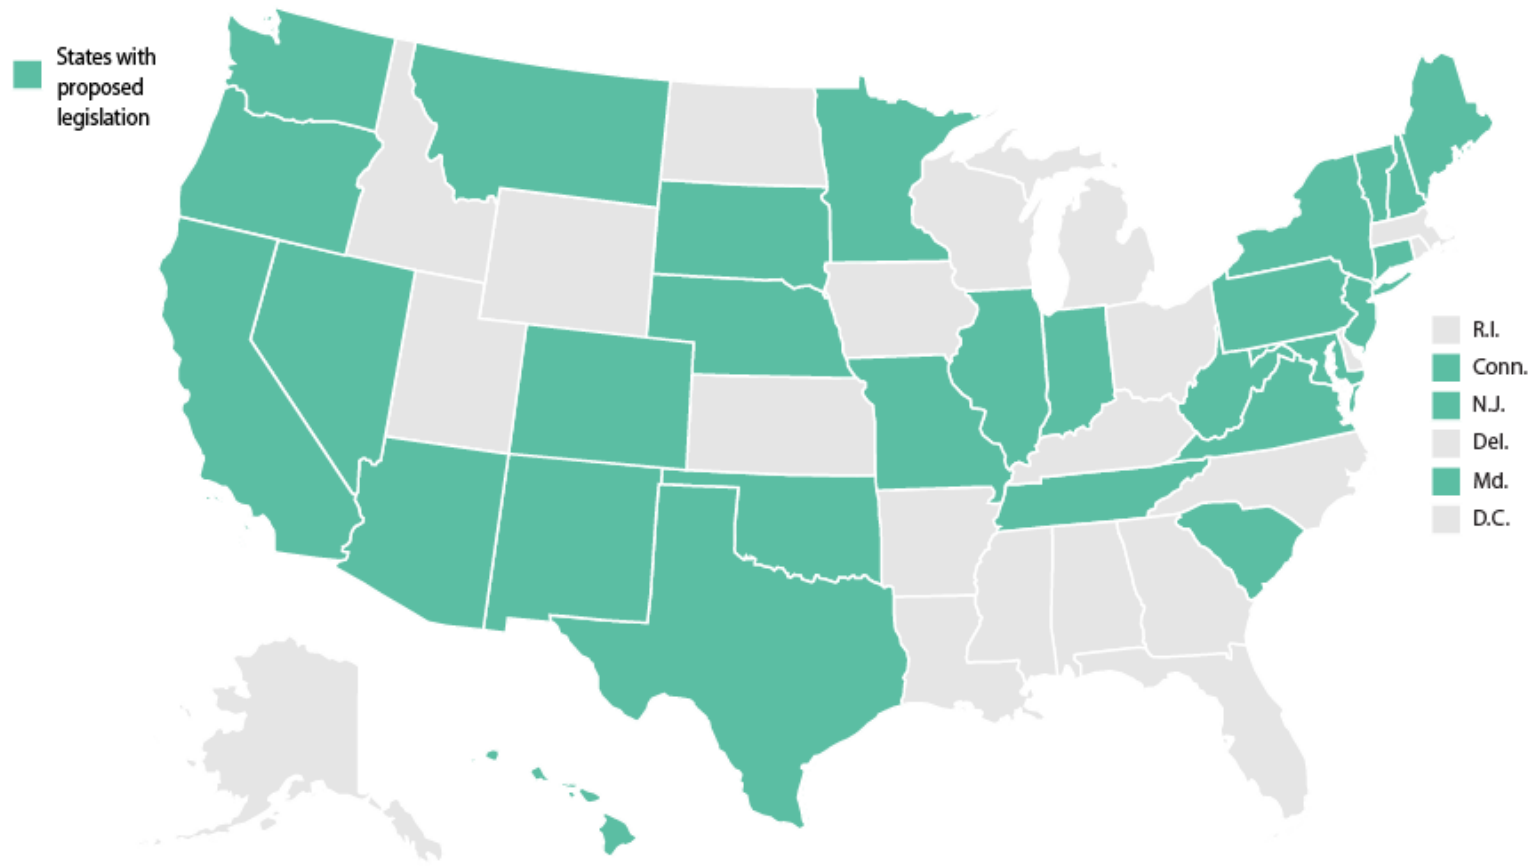

- Herd immunity...a concept derived from immunity conferred on a herd of cattle if 95% of the herd had gotten the disease naturally or were vaccinated.
- The gene pool of breeds of cows is very limited.
- The gene pool of humanity is vast.
- Herd immunity (mythical sound bite) is impossible in the human population as children are only a small part of a larger herd.
- 95% of the entire nation must be vaccinated with booster shots from cradle-to-grave in an attempt to achieve herd, which is unachievable. Vaccines are not only ineffective depending on the individual receiving them, but does not confer life long immunity and is the cause of chronic disease.

110 STATE VACCINE BILLS, 36 STATES

2015 Legislative session

29 States Have Introduced Vaccine Bills in 2015

Many would make it harder for parents to opt out of immunizing their kids.

Source: National Vaccine Information Center

Mother Jones

Sample legislations 2015

- Eliminates the personal belief exemption in California
- Eliminates the religious belief exemption to vaccination in Maryland
- Eliminates both the religious and philosophical belief exemptions in VT
- Requires all school students, teachers, administrators, and staff members to be fully vaccinated

Sample Legislations 2015

- **Allows pharmacists to administer any vaccine to minors 14 and older without parental consent**
- **HPV Vaccines for minors without parental consent or knowledge**
- **Allows minors 14 and older in the Texas Juvenile Justice System to consent to vaccination**
- **Prohibits day care providers from hiring anyone who has not been vaccinated with 3 vaccines**
- **Requires health care providers be vaccinated for flu**
- **Mandates all college students living in on-campus housing be vaccinated for meningococcal disease**

Sample Legislation 2015

- Expands police powers to detain individuals suspected of exposure to communicable diseases
- Requires notarization and education for religious belief exemptions
- Requires physician counseling for conscientious and religious belief exemption
- Severely Restricts Religious Exemption to Vaccine Mandates
- Restricts the religious exemption to vaccination by changing the language

To help call & email Legislators go to
<http://nvicadvocacy.org/>

- [Provides liability protections to dentists who administer vaccines](#)
- [Allows disclosure of a patient's immunization record without the patient's authorization](#)
- [Requires doctor certification for parents using a personal belief exemptions for school/child care](#)
- [Requires parents receive a letter from the principal if there is a nonvaccinated child in attendance](#)
- [Requires schools provide information on HPV Vaccines in any course in sexual education](#)

1 out of 6 children in America are developmentally disabled

<http://www.cdc.gov/ncbddd/developmentaldisabilities/features/birthdefects-dd-keyfindings.html>

274,000 infants and 370,000 toddlers in the US are taking anti-anxiety sedatives and antidepressant drugs (Xanax, Prozac)

<http://www.madinamerica.com/2015/03/many-toddlers-taking-psychiatric-drugs/>

25% of American children are on
pharmaceutical drugs

<http://vaccineliberationarmy.com/2011/08/24/25-of-american-children-are-on-psyche-drugs/>

1 out of 50 children have Autism today

1 in 42 boys have Autism today

1 in 28 boys in New Jersey have Autism

Why is there an “epidemic” of childhood mental illness & chronic disease in the 21st century?

Why is cancer the #1 cause of childhood death in the United States, the most vaccinated country in the world in the 21st century?

WHAT IS IN A VACCINE?

**Do You Know
WHAT'S IN A VACCINE?**

- **ammonium sulfate** (salt)
Supports preservation, has uses in respiratory system products.
- **beta-propiolactone**
Used in some vaccines. Supports preservation, has respiratory and oral uses in eye products.
- **genetically modified yeast, animal, bacterial & viral DNA**
Can be incorporated into the vaccine's DNA and used to produce protein molecules.
- **latex rubber**
Can cause skin rashes, allergic reactions.
- **sodium glutamate**
(Monosodium glutamate acid)
Helps control the viscosity, manages immunoreactive effectiveness and water-binding and stabilizes other ingredients. Helps stabilize the pH.
- **aluminum**
Highly refined as a trace of trace impurities. Used in aluminum's. Helps stabilize vaccines and other drugs. Controls pH and pH.
- **formaldehyde** (preservative)
Helps control the viscosity, helps stabilize the vaccine. Helps stabilize vaccines against preservation, has respiratory system uses, respiratory system and respiratory system. Used in laboratory, food, and pharmaceutical uses.
- **micro-organisms**
Used and killed in all vaccines. In that sense, the pathogen is the microorganism. It is a vaccine. After the killing up to human body, including immunization, have been used in respiratory.

"What better way to be in the world than to be a vaccine in the form of a vaccine."

A major cause of the Roman Empire's decline, after six centuries of world dominance was its replacement of stone aqueducts by lead pipes for the transport and supply of drinking water. Roman engineers, the best in the world, found their fellow citizens were neurologically crippled. Today we mean "best and brightest," with the best of intentions, achieve the same end through childhood vaccination programs providing the modern sources of hyperactivity, learning disabilities, autism, bipolar disorder, and impulsive violence.

— Harris J. Coulter Ph.D.

- **polyorbate 80**
Based on other uses in vaccines.
- **tri(n)butylphosphate**
Supports stability and uses in vaccines.
- **glutaraldehyde**
Preserves and supports vaccine stability in experimental animals.
- **gelatin**
Extracted from animal parts of calf and pig skin. Used in vaccines and other products. Helps stabilize vaccines and other products.
- **benzalkonium chloride & polyvinyl alcohol**
Helps stabilize vaccines and other products.
- **mercuric**
One of the most common preservatives. Used in vaccines to help stabilize vaccines and other products. Helps stabilize vaccines and other products.
- **deoxyribitol sulfate**
Helps stabilize vaccines and other products. Used in vaccines to help stabilize vaccines and other products.
- **phenol/phenoxethanol**
Used in vaccines to help stabilize vaccines and other products. Helps stabilize vaccines and other products.
- **human & animal cells**
Human cells have been shown to be used in vaccines. They have been used in vaccines, including egg, pig kidney, cow heart, monkey kidney, and various other cells, all used in vaccines and other products.

Vaccine Ingredients

CDC Vaccine Excipient & Media Summary

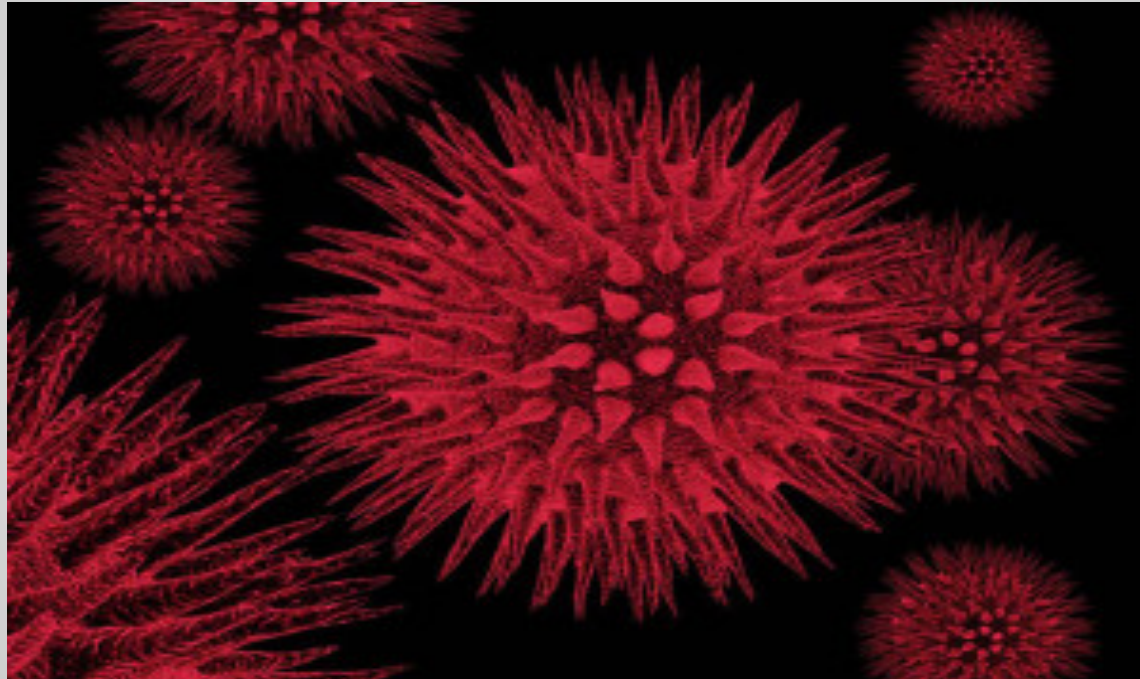

Common sense: **Would you give your infant 8 drugs at one time with these ingredients?**

- **Dtap (Pediarix):** Formaldehyde, gluteraldehyde, **aluminum** hydroxide, **aluminum** phosphate, lactalbumin hydrolysate, polysorbate 80, **neomycin**, sulfate, polymyxin B, yeast protein, **calf** serum, Fenton medium (containing bovine extract), modified Latham medium (derived from **bovine** casein), modified Stainer, Scholte liquid medium, Vero (**monkey kidney**) cells (given 3 doses -2, 4 & 6 months)
- **Hib/Heb B (Comvax):** Yeast, nicotinamide adenine dinucleotide, hemin chloride, soy peptone, dextrose, mineral salts, amino acids, **formaldehyde**, potassium **aluminum** sulfate, amorphous aluminum, hydroxyphosphate sulfate, sodium borate, phenol, **ethanol**, enzymes, detergent (2, 4, and 12-15 months of age)
- **HepA/HebB (Twinrix)** Formalin, yeast protein, **aluminum** phosphate, **aluminum** hydroxide, amino acids, phosphate buffer, polysorbate 20, neomycin sulfate, MRC5 **human diploid cells** (A series of 3 doses - 0, 1, & 6-month)

Excipient chart for all vaccines

<http://vaccineliberationarmy.com/wp-content/uploads/2015/03/CDC-Vaccine-excipients-table-2.pdf>

Studies show: “Natural” Mumps, Measles, Chicken Pox & Influenza viruses protect against cancer

The US Public Health Policy Is Harming the Population

<http://vaccineliberationarmy.com/2015/03/10/studies-show-natural-mumps-measles-chicken-pox-influenza-viruses-protect-against-cancer/>

Measles Protects Against Cancer

- **MEASLES:** Albonico et al found that adults are significantly protected against non-breast cancers -- genital, prostate, gastrointestinal, skin, lung, ear-nose-throat, and others -- if they contracted measles (odds ratio, OR = 0.45), rubella (OR = 0.38) or chickenpox (OR = 0.62) earlier in life. [*Med Hypotheses* 1998; 51(4): 315-20].
- **MEASLES:** Montella et al found that contracting measles in childhood reduces the risk of developing lymphatic cancer in adulthood [*Leuk Res* 2006; 30(8): 917-22].
- **MEASLES:** Alexander et al found that infection with measles during childhood is significantly protective -- it cuts the risk in half -- against developing Hodgkin's disease (OR = 0.53) [*Br J Cancer* 2000; 82(5)].
- **MEASLES:** Glaser et al also found that lymph cancer is significantly more likely in adults who were not infected with measles, mumps or rubella in childhood [*In J Cancer* 2005; 115(4): 599-605].

Mumps & Chicken Pox Protect Against Cancer (studies show)

- **MUMPS:** Researchers investigated whether mumps might engender immunity to ovarian cancer through antibodies against the cancer-associated antigen MUC1 abnormally expressed in the inflamed parotid gland.
- **CHICKEN POX IN CHILDHOOD:** Chickenpox in childhood is associated with decreased atopic disorders, IgE, allergic sensitization, and leukocyte subsets.
- **INFLUENZA VACCINES** Influenza Virus Infection Elicits Protective Antibodies and T Cells Specific for Host Cell Antigens Also Expressed as Tumor-Associated Antigens: A New View of Cancer
- **VARICELLA-ZOSTER VIRUS:** Canniff et al. reported an association between those individuals with clinical or laboratory evidence of varicella-zoster virus (VZV) infection and lower risk of glioma. A **glioma** is a type of [tumor](#) that starts in the brain or spine. It is called a glioma because it arises from [glial cells](#)

Polio Vaccine & the Cancer Epidemic

- **COMMON INFECTIONS:** Gilham et al found that infants with the least exposure to common infections have the greatest risk of developing childhood leukemia [*BMJ* 2005; 330: 1294].
- **EARLY EXPOSURE TO INFECTIONS:** Urayama et al also found that early exposure to infections is protective against leukemia
- **POLIO** The early polio vaccine, given to millions of children in the 1950s contained a cancer causing virus, SV40. This virus has been found in biopsies of cancer tissue today.
<http://vaccineliberationarmy.com/2015/02/05/polio-vaccine-1950s-cause-cancer-epidemic-via-virus-sv40-contained-polio-vaccine/>
<http://olpa.od.nih.gov/hearings/108/session1/reports/polio.asp>

<http://vaccineliberationarmy.com/2015/03/10/studies-show-natural-mumps-measles-chicken-pox-influenza-viruses-protect-against-cancer/>

Genetically Manipulated viruses

- Bio-Pharmacuetical researchers have discovered that **natural childhood infectious diseases protect against some cancers**
- Researchers hypothesized that if natural childhood diseases prevent cancer, the same virus (albeit **genetically engineered**), could destroy cancer cells in those who failed to be protected due to the Public Health policy of eradicating minor childhood diseases.
- **However**, rather than change public health vaccine policy to allow for natural minor childhood disease infections that help protect against cancer, bio-pharmacuetical companies are experimenting with potentially dangerous genetically engineered viruses to cure the cancer we might never have gotten.
- Patentable genetically engineered virus, administered at high dose, destroys cancer cells www.mayoclinicproceedings.org/article/S0025-6196%2814%2900332-2/pdf
- **However**, rather than change public health vaccine policy to allow for natural minor childhood disease infections that protect against cancer...

Eradicating infectious childhood diseases

...the Human Health Service (HHS) and its industry partners expands its failed public health policy - adds more boosters to compensate for ineffectual vaccine immunity, adds an adult vaccine program to achieve herd immunity - moving closer to transhumanism technologies.

STAKEHOLDER STRATEGY

- Eliminate “free” natural measles infections via expensive patented vaccines...thereby...
- Facilitating an epidemic of cancer of which natural immunity would prevent
- Cure the cancer with expensive patentable genetically engineered measles virus

Why not let us have our minor childhood infectious disease that may prevent cancer in the first place?

THEY ARE FREE!

Vaccines, The Gateway to Transhumanism

- The main science mega-project of the *2045 Initiative* aims to create technologies enabling the transfer of an individual's personality to a more advanced non-biological carrier, and extending life, including to the point of immortality.
- The industries behind the already mature and international Transhumanism movement are the Biotechnology, Nanotechnology and Artificial Intelligence industries.

<http://2045.com/news/33635.html>

GOAL OF TRANSHUMANISM

NEO HUMANITY

- **The transfer of human consciousness into non- biological systems**
- **Military objectives:** Super Soldiers
- **Health strategy:** The more chronically ill the population becomes the more it will clamor for 3 D printing organs, implants, bionics, fast tracking the advent of full transhumanism
- **March toward Transhumanism:** Converting living tissue into "vaccine-making factories" (like GMO Bt Corn) through the use of DNA and Recombinant Vector Vaccines

"We have not improved health. We have changed the disease mix. We have exchanged infectious disease for chronic illness" - former NIH researcher, Dr. Bart Classen

Synthetic Immunity

- Transhumanism participates in a dialectic which requires a simultaneous and systematic deconstruction of humanity as we have known it.
- The point of no return (if not already traversed): The mass introduction of DNA and Recombinant Vector Vaccine technology. (genetic engineering)

<http://www.activistpost.com/2012/01/vaccination-agenda-implicit.html>

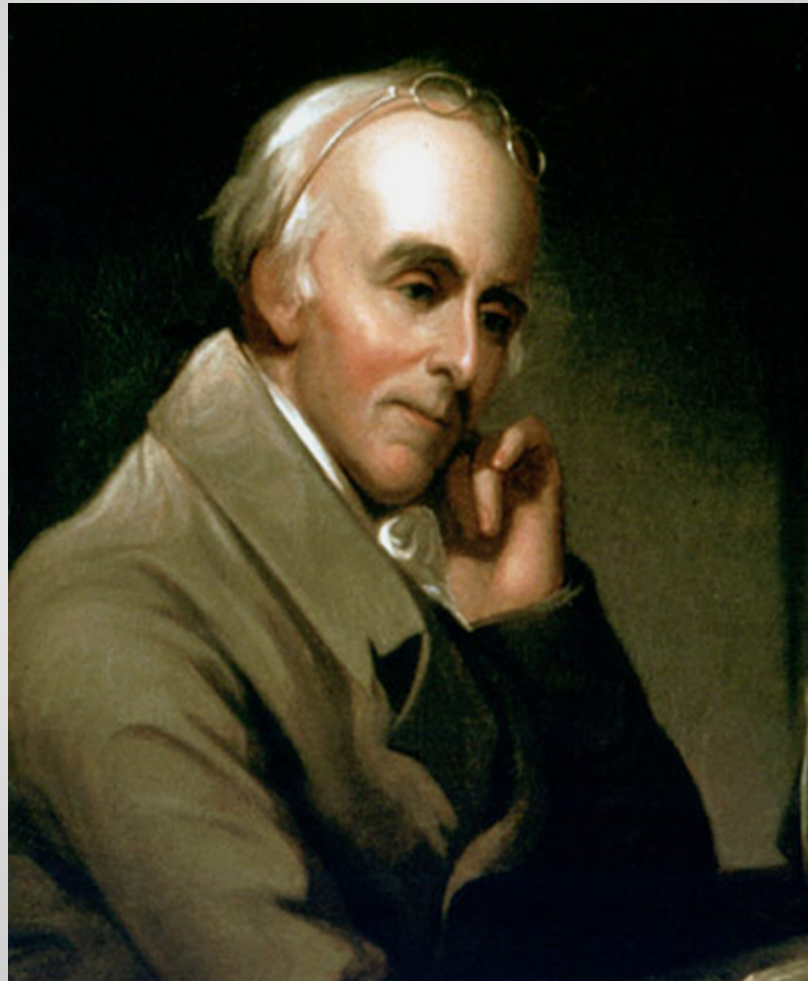

Senior Researcher (MIT) Stephanie Seneff predicts
Vaccines & GM0 food will raise the autism rates to 1
out of 2 children in 2025

Benjamin Rush - Declaration of Independence

The Constitution

MEDICAL TYRANNY

- *“The Constitution of this Republic should make special provision for medical freedom. To restrict the art of healing to one class will constitute the Bastille of medical science. **All such laws are un-American and despotic.** ... Unless we put medical freedom into the constitution the time will come when medicine will organize into an undercover dictatorship and force people who wish doctors and treatment of their own choice to submit to only what the dictating outfit offers”*

-Benjamin Rush

Vaccines are disabling entire generations of emerging humanity

Help us, please
